3) yeah in questions form there will be things like whether you drink or smoke or whatever general preferences people want to filter they can filter it from there

4) Every attribute is going to be neutral just like a normal filter there will be no prioritization

5) i would say AI will see and check every possible thing in profile

6) Yes they can how much they want (As there will be no AI for that its going to be simple database filtering process and for now we will say its AI so that there will be no unnecessary cost for that and users can enjoy it)

7) For now its going to be simple data base filtering thing so people can search it and see if there any new profile came in or not

8) **ANSWERED IN 1st DOC**

9) we can show all details In that box like photo, name, age, plus a profile mathcing percentage icon like 99% or 98% depends upon the keywords searched by the user

10) They can only like the profile from that grid view and can open teh profile for more details and further actions

11) Everything whatever normal things that have been told by the user

12) yes there will be a LIKE button

13) Mutual Like acceptance

14) Yes we can have all of them (text, emojis, image sharing, voice notes)

15) NO (If there is any problem with that like cost issue then yes)

16) (new match, new message, profile view)

17) in settings they can toggle which noti they want

18) online/offline indicators will be there but read receipts will come with premium

19) **Answered in 1st DOC**

20) For now i am think there will be 1 sub for monthly, quarterly or annually

21) Yes there will be monthly, quarterly or annually

22) yea there will be few like profile boosts, virtual gifts

23) i want it simple like hinge, tinder looks a lil bit complex tho its not much but i want when someone comes in they can pretty much learn the platform quickly

24) there will be questions in the start to understand the user personality which is going to be used by AI (if used)

25)
